LAB 11: ITECalculator

In this lab, you will continue your ITECalculator that allows the user to do binary arithmetic operations.

A. In the BinaryArithmetic class, please add the following methods

1. multiplyBinary to do the binary multiplication

2. divideBinary to do the binary division

B. Please add java doc comments in each method

Note: Please implement this three methods based on the rule that we learn in Computer Fundamental course at year 1 semester 1. Please consult with chapter 2 of the book again if you are facing problem with binary arithmetic.
